

F-16 FUSELAGE STANDS

4 PCS, SERVICE MAINTENANCE MODULES

F-16 FUSELAGE STAND LEFT / RIGHT SIDE

Our F-16 Fuselage Stands / Service Maintenance Modules (4 pcs) represent the cutting-edge in next-generation maintenance platforms. These stands are meticulously tailored to the unique contours of the F-16 fuselage, offering an optimal workspace. They excel in cockpit maintenance, ejection seat servicing, canopy care, aircraft body and other forward component tasks, boasting a built-in PMA desk for added convenience. Expansive storage area beneath allows for convenient storage and retrieval of parts and equipment.

Crafted from powder coated lightweight aluminum and featuring separate locks to stabilize the moduls, these stands also come equipped with non-slip materials and rubber bumper edges to safeguard against aircraft damage. With an impressive weight capacity of 200kg/m2, this represents a substantial improvement over legacy stands.

F-16 FUSELAGE STAND LEFT / RIGHT SIDE

In addition to the front stands, there are also two rear stands (LH/RH) for comprehensive maintenance support. These rear stands perfectly complement the front stands, enhancing accessibility and versatility for servicing the F-16 aircraft rear area. This complete set of stands offers a holistic maintenance solution, allowing you to efficiently address all maintenance requirements for the F-16 fuselage and its various components.

Furthermore, each of these stands features integrated LED strips along all of its posts, providing distinctive and customizable lighting options directed towards the aircraft. This innovative lighting system not only enhances visibility but also adds a unique and stylish touch to your maintenance operations, making your workspace both functional and visually appealing. The integrated LED lighting can be conveniently controlled through a dedicated mobile application (APP), allowing you to adjust the brightness levels to your preference. With this feature, you have the flexibility to dim or brighten the lighting as needed, ensuring optimal visibility and creating an ideal working environment for your maintenance tasks.

For those seeking personalization options, laser etching for Tool ID, artwork, and patches can be arranged upon request.

Technical Features Tab:

- Lightweight aluminium construction
- Powder coated
- Nonslip stairs and platform
- Protective rubber edges
- PMA desk integrated on the outside of railing
- Workstation integrated on the outside of railing
- Aviation Tool Kit integration capability
- Shelving for parts and equipment located on top and bottom of stand
- Breathable air hookup
- 230V electric outlets with facility power hookup
- LED lighting integrated into custom alu.posts
- HSE supported
- Removable side railings
